AGUA

LUXURY PERFORMANCE FABRICS

Fabric Care

Remove all stains immediately before they set

Always try cleaning products on a hidden piece of fabric to test suitability

Use a vacuum cleaner or soft brush to remove dust and solid particles

Most stains can be removed using cold/warm water and a clean microfibre cloth

Use cold water when treating stains caused by bodily fluids

Stains from products containing oil and grease should be treated with a spirit based solution

Clothing dyes and biro are very difficult to remove from any fabric

If soap based cleaners are used, all soap residues must be rinsed from the fabric

Can be cleaned with mild Hypochlorite solutions (half a cup of household bleach with 5 litres of water) or Mineral Spirit

Can be steam cleaned in situ

Do not machine wash or dry clean

Do not use: solvents, abrasives, chemical agents, waxes or polishes

Agua-Clean Vinyl and Leather cleaner is specifically designed for this product

Please refer to the fabric care sheet on the Agua website for further details
