## QUALITY WITHOUT COMPROMISE

The **COLINA** range of anti-bacterial contract vinyls from CTP Textiles combines style, safety and quality at an affordable price. The products in the **COLINA** range are flame retardant to CRIB 5 and comply with all other relevant requirements for contract use. They are suitable for heavy domestic and contract upholstery, as well as for a wide range of commercial seating and healthcare furniture applications.

Independent testing has verified that **COLINA** vinyl is effective at inhibiting the spread of bacteria such as MRSA, *E.coli* and *C.difficile*.

**COLINA** contract vinyls are easy to use, easy to clean and are available in a range of 20 colours. The base colour of each fabric is used throughout the coating process so scuff marks are almost invisible.

## CARE AND MAINTENANCE

**COLINA** contract vinyls are resistant to most alkalis, mild acids, drinks and common stains but it is advisable to clean them regularly to maintain their smart appearance and prevent a build-up of residue. The surface of the vinyls can be cleaned using a damp, soapy cloth, and then rinsed with cold water and wiped dry. For more stubborn stains a soft brush with soapy water can be used, again rinsing with cold water and wiping dry. Disinfectants can be used in dilution as specified by the manufacturer.

Stains from chemical colourings such as ballpoint pens, dyes and food colourings should be cleaned off as soon as possible to avoid long-term staining. Strong detergents, solvents, bleaches, wax polishes and aerosol sprays must not be used as they may be harmful to the vinyl.

Certain clothing and accessory dyes (such as those used on denim jeans) may migrate to lighter colours. This phenomenon is increased by humidity and temperature and is irreversible. CTP Textiles will not assume responsibility for dye transfer caused by external contaminants and possible permanent staining caused by this phenomenon.

## TECHNICAL INFORMATION

COMPOSITION:	Topcoat – PVC 85% Backing – Polycotton 15%
WEIGHT:	750 g/m <sup>2</sup> (nominal)
THICKNESS:	1.10mm to 1.20mm
ROLL WIDTH:	140 cm ± 2cm (nominal)
ROLL LENGTH:	30 m (nominal)
ABRASION RESISTANCE:	Martindale >120,000 cycles
ANTI-BACTERIAL:	AATCC 147
FLAME RETARDANCY*:	BS5852 Part 2 CRIB 5 EN/BS/ DIN 1021 Parts 1&2 NF P 92-507 / M2

\* This term and any corresponding data refer to the typical performance in the specific tests indicated and should not be construed to imply the behaviour of this or any other material under actual fire conditions.
