# MARDI GRAS

## QUALITY WITHOUT COMPROMISE

The **MARDI GRAS** range of colourful, phthalate-free and antimicrobial contract vinyls from CTP Textiles combines style, safety and quality at an affordable price.

**MARDI GRAS** is flame retardant to CRIB 5 and complies with all other relevant requirements for contract use. It is suitable for heavy domestic and contract upholstery, as well as for a wide range of commercial seating and health-care furniture applications.

Independent testing has verified that **MARDI GRAS** is effective at inhibiting the spread of bacteria such as MRSA, *C.difficile*, *E.coli* and microorganisms such as *A.brasiliensis*.

**MARDI GRAS** contract vinyls are phthalate-free, easy to use, easy to clean and are available in a range of 20 colours. The base colour of each fabric is used throughout the coating process so scuff marks are almost invisible.

## CARE AND MAINTENANCE

**MARDI GRAS** contract vinyls are resistant to most alkalis, mild acids, drinks and common stains but it is advisable to clean them regularly to maintain their smart appearance and prevent a build-up of residue.

The surface of the **MARDI GRAS** vinyls can be cleaned using a damp, soapy cloth, and then rinsed with cold water and wiped dry. For more stubborn stains a soft brush with soapy water can be used, again rinsing with cold water and wiping dry. Disinfectants can be used in dilution as specified by the manufacturer.

Stains from chemical colourings such as ballpoint pens, dyes and food colourings should be cleaned off as soon as possible to avoid long-term staining. Strong detergents, solvents, bleaches, wax polishes and aerosol sprays must not be used as they may be harmful to the vinyl.

Certain clothing and accessory dyes (such as those used on denim jeans) may migrate to lighter colours. This phenomenon is increased by humidity and temperature and is irreversible. CTP Textiles will not assume responsibility for dye transfer caused by external contaminants and possible permanent staining caused by this phenomenon.

## TECHNICAL INFORMATION

COMPOSITION:	Topcoat – PVC 85% Backing – Cotton 15% Phthalate-free
WEIGHT:	750 g/m <sup>2</sup> (nominal)
THICKNESS:	1.10mm to 1.20mm
ROLL WIDTH:	140 cm ± 2cm (nominal)
ROLL LENGTH:	30 m (nominal)
ABRASION RESISTANCE:	Martindale >120,000 cycles
FLAME RETARDANCY*:	BS5852 Part 2 CRIB 5 EN/BS/ DIN 1021 Parts 1&2 NF P 92-507 / M2 EN71-2: 2006+AI: 2007 Safety of Toys – Part 2: Flammability
ANTIMICROBIAL:	AATCC 147 and AATCC 30

\* This term and any corresponding data refer to the typical performance in the specific tests indicated and should not be construed to imply the behaviour of this or any other material under actual fire conditions.

## AVAILABILITY
