## QUALITY WITHOUT COMPROMISE

The new improved **SIERRA+** range of contract vinyls combines style, safety and quality at an affordable price. The products in the **SIERRA+** range are flame retardant to Crib 5 and comply with all other relevant requirements for contract use. They are suitable for heavy domestic and contract upholstery, as well as for a wide range of commercial seating and healthcare furniture applications.

**SIERRA+** contract vinyls are easy to use, easy to clean and are available in a wide range of colours. **SIERRA+** now has antimicrobial and antibacterial protection that resists gram negative and gram positive bacteria (including MRSA), filamentous fungi and yeast.

## CARE AND MAINTENANCE

**SIERRA+** contract vinyls are resistant to most alkalis, mild acids, drinks and common stains but it is advisable to clean them regularly to maintain their smart appearance and prevent a build-up of residue. The surface of the vinyls can be cleaned using a damp, soapy cloth, and then rinsed with cold water and wiped dry. For more stubborn stains a soft brush with soapy water can be used, again rinsing with cold water and wiping dry. Disinfectants can be used in dilution as specified by the manufacturer.

Stains from chemical colourings such as ballpoint pens, dyes and food colourings should be cleaned off as soon as possible to avoid long-term staining. Strong detergents, solvents, bleaches, wax polishes and aerosol sprays must not be used as they may be harmful to the vinyl.

Certain clothing and accessory dyes (such as those used on denim jeans) may migrate to lighter colours. This phenomenon is increased by humidity and temperature and is irreversible. CTP Textiles will not assume responsibility for dye transfer caused by external contaminants.

## TECHNICAL INFORMATION

COMPOSITION:	Topcoat - PVC 85% Backing - Polyester Cotton 15%
WEIGHT:	740 g/m <sup>2</sup> (nominal)
ROLL WIDTH:	137 cm (nominal)
ROLL LENGTH:	30m (nominal)
ABRASION RESISTANCE:	Martindale >100,000 cycles
ANTI-FUNGAL:	Mildew Resistant ASTM G-21
ANTIBACTERIAL:	AATCC Test Method 147
ANTI-STATIC:	ASTM D-257
FLAME RETARDANCY*:	BS5852 Part 2 CRIB 5 EN / BS / DIN 1021 Parts 1 & 2 NF P 92-503 / M2 UNE 23.727-90 / M2 FMVSS 302 IMO A.652 (16) 8.2 & 8.3

\* This term and any corresponding data refer to the typical performance in the specific tests indicated and should not be construed to imply the behaviour of this or any other material under actual fire conditions.
