Fabric Care

Remove all stains immediately before they set

Always try cleaning products on a hidden piece of fabric to test suitability
Use a vacuum cleaner or soft brush to remove dust and solid particles

Most stains can be removed using cold/warm water and a clean microfibre cloth
Use cold water when treating stains caused by bodily fluids

Stains from products containing oil and grease should be treated with a spirit based solution

Clothing dyes and biro are very difficult to remove from any fabric and may cause permanent stains

Do not use marker pens on the back of the fabric

If soap based cleaners are used, all soap residues must be rinsed from the fabric
For infection control situations this fabric can be cleaned with mild Hypochlorite solutions (10,000 ppm of available chlorine) e.g.: Tristel Fuse for Surfaces, Haz Tabs, Chlor-Clean.
Continued use may cause discolouration and surface damage

Can be steam cleaned in situ
Do not machine wash or dry clean
Do not use: solvents, abrasives, chemical agents, waxes or polishes
Please refer to fabric care sheet on the Agua website for further details
