Recommended Cleaning:	• Clean and care for the fabric on a regular basis and it will maintain its condition and appearance. Most stains can be removed by wiping clean. • Microfibre cloths are extremely effective without soap, which is helpful as soap can clog your fabric. • Vacuum and wipe clean regularly with a damp cloth, (as specified above) and water to remove dust particles and prevent build up of soiling. • Take care not to cause abrasive damage. • Remove spillages promptly with an absorbent dry cloth. • For heavier soiling, use a mild proprietary cleaner and warm water ensuring that cleaning product residues are removed as this inhibits the stain repellent. • Bodily fluids should be removed promptly with cold water and then cleaned as above. • Water and oil based stains may be removed by using most water based household proprietary spray cleaning agents, following instructions carefully. • Extreme soiling may be cleaned with a 5% sodium hypochlorite (bleach) solution. • Do not apply other chemicals/stain removers. • Do not machine wash, fully immerse or dry clean.
